Xphase PNO file download tool

User manual

Software Description

The Xphase PNO file download tool was independently developed by Beijing Xiang Feng Ming Tian Technology Co., Ltd., and is used to download panoramic photo files (".pno" files) on mobile phones or tablets using iOS or Android systems to the computer where the software is installed.

Software Installation

1 Equipment requirements

1.1 The computer's memory is not less than 4GB, 64-bit operating system, the operating system version is not lower than Windows7

2 Software acquisition and installation

2.1 This program will be installed when installing "Xphase Panorama Manager" .

Please refer to "Xphase Panorama Manager User Manual"

Instructions for use

1 Prerequisites

1.1 If the phone or tablet is running the “Xphase Panorama Manager” and is connected to the camera hotspot, you need to exit the “Xphase Panorama Manager” first.

1.2 Disconnect the WIFI of the mobile phone or tablet from the camera hotspot and connect the WIFI to the same router as the computer to be synchronized.

1.3 Run “Xphase Panorama Manager” on your mobile phone or tablet, click on the bottom left corner of the interface , and the software will jump to the panoramic photo file management interface. Click on the top menu  and the pop-up menu will display the current IP address and password. For detailed steps, please refer to the Xphase Panorama Manager User Manual.

2 Set the remote device address

2.1 Start the “Xphase PNO File Download Tool” on the computer, and enter the IP address and password displayed on the mobile phone or tablet in the “Remote Device Address” setting area on the left side of the interface.

2.2 Click the “Refresh List” button, and the “Remote Pno File List” area in the middle of the interface will display thumbnails of all panorama photo files (“.pno” files) on your phone or tablet.

3 Set the local download path

3.1 Click the "Select Path" button in the "Local Download Path" setting area on the left side of the interface, and select the path where you want to save the panorama photo file (".pno" file). The "Local pno file list" area on the right side of the interface will display the Thumbnail of a panorama photo file (".pno" file) in the path

4 Set the download method

There are four download methods: download all ".pno" files on the remote device and skip the local file with the same name. Download all ".pno" files on the remote device and overwrite the local file with the same name. Download the selected remote device. The ".pno" file skips the local file with the same name and downloads the ".pno" file on the selected remote device and overwrites the local file with the same name. Select the desired download method in the "Download Method" setting area on the left side of the interface.

5 Download the panorama photo file (".pno" file)

5.1 If the download mode is "Download selected files and skip local files with the same name" or "Download selected files and overwrite local files with the same name", you need to click the thumbnail of the "remote pno file list" area in the middle of the interface to select the files to be downloaded (Can choose more)

5.2 Click the "Start Download" button on the left side of the interface, the software will download the panoramic photo file (".pno" file) on the mobile phone or tablet to the selected local download path according to the selected download method, and the interface will be right. The "local pno file list" on the side will be updated; if you need to terminate the download, you can click the "Cancel Download" button

Do not delete the panorama photo file (".pno" file) on your phone or tablet after clicking the "Refresh List" button until the download is complete.

During the download process, you need to ensure that the "Xphase Panorama Manager" on your phone or tablet is running in the foreground, and try to prevent the phone or tablet from entering the screen lock or showing off.
